Implementation & Deployment

End-to end services, or specialist services for any layer of the infrastructure.

Implementation & Deployment - Virtualization Solutions

From end user computing to data center management and recovery, Progression delivers all solutions using VMware products

Server Virtualization & Consolidation

- > Infrastructure Assessment for consolidation
- Compute/Storage/Network/Security Virtualization Stack Deployment
- Virtualization of business critical applications
- Data Center Virtualization Consulting Services

Data Center and Cloud Management

- Data Center Consolidation and transformation to Cloud (Private/Public/Hybrid)
- Cloud Operations Management
- Cloud Automation
- Data Centre Migration

Desktop & End-User Computing

- Desktop Virtualization Solutions
- Application Virtualization
- Mobile Secure Desktop
- BYoD Integration

Software Defined Data Center

- Cloud Automation with Workflow Integration
- Self Service Portal/SSO/Chargeback
- > Operation Management & Monitoring

Disaster Recovery

- Business Continuity
- Disaster Recovery as a Service

Implementation & Deployment - Microsoft Technologies

Progression delivers infrastructure for Microsoft messaging, business applications, databases, and more

Core Infrastructure

 Site specific design and build for running infrastructure applications like Active Directory, DNS, DHCP, WSUS, AV Server, etc

Virtualization

- Private Cloud
- Desktop Virtualization

Messaging and Collaboration

- Microsoft Exchange
- Unified Communications
- Microsoft SharePoint

Database

Microsoft SQL

Security

> Forefront

Business Applications Infra

- Microsoft Dynamics
- Microsoft SharePoint

Cloud Management

System Centre

Implementation & Deployment - Database Management

Progression delivers migration, upgradation, implementation and support services for all types of major enterprise databases

Technologies

Solutions

- Design and Architecture
- Installation and Configuration Management
- Database Analysis and Tuning
- Security Audit & Advisory
- Migration & Support
- Administration & Maintenance
- High availability configuration (replication, mirroring, copying)
- Backups
- Database Administration as a Service

Implementation & Deployment - Enterprise Application Environments

Progression designs and deploys infrastructure for business critical applications

Business Critical Applications

- ERP (SAP, Microsoft Dynamics, Oracle)
- Collaboration & Unified Communications
- > CRM
- > SCM
- Point of Sale

Architecture

- > IA-64
- > x86
- Spark

Solutions

- Compute and Storage Sizing
- Networking & Security
- Deployment
- Optimization
- Remote Infrastructure Monitoring
- Backup Solutions
- Archiving Solutions
- SSO, Data Theft Control & Security Solutions

Implementation & Deployment - Unix Administration

Progression handles administration for all flavors of Unix

Platforms

- > HP-UX
- Oracle Solaris
- > Linux

Solutions

- > High Availability and Business Continuity
- OEM's Native Cluster Technology (Oracle Cluster, HP ServiceGuard, RAC etc)
- Third Party Cluster Solution
- Integration (Veritas, NEC, Quest)

Services

- Administration Services
- Change Management
- > Fault Management
- > Hardware Management
- Performance Management
- Operations Management
- Upgradation and Migration

Robust Delivery Model

A combination of on site coordination and off site implementation delivers the best of both worlds to IT infrastructure service providers

ON SITE COORDINATION

Scoping, Knowledge Acquisition, Project Co-ordination, Hands & Eye Support

OFF SITE IMPLEMENTATION

Implementation can be done Remotely from Progression's NOC. **70-90**% can be offshored

REMOTE MONITORING & MANAGEMENT

LEVEL 1 SUPPORT

Incident Management, Service Desk for escalations, knowledge repository Pro-active Performance Monito ring, Threshold Alerts, Dashboard Reporting

LEVEL 2 & 3 SUPPORT

Problem, Change, Capacity & Performance management

24x7 RIMM Service

Progression can monitor and manage the IT infra for availability and performance so that your client's businesses can run efficiently

- Monitoring of all layers of IT resources including networks (WAN, LAN, security), compute, storage, hypervisors, operating systems, databases and applications.
- Dashboards to view the entire IT setup.

24x7 RIMM Service

- Comprehensive view various parameters and granular notifications and alerting to help resolve issues before they impact uptimes.
- 24x7 dedicated management by domain experts and technical specialists.

Success Stories

Success Story Hosted services provider based in Sweden

quality.

messaging.

Success Story India's largest glass bottle and container manufacturer

Success Story

India's largest two wheeler manufacturer

Data Center Consolidation & Optimization

Success Story One of Oman's Largest Enterprises

Key Relationships

- Partner since 1997
- Progression has I mplemented the largest blade server solutions for HP in India
- We have implemented high-performance cluster storage

- Partner since 2006
- Deployed the largest VDI solution in India
- Implemented significant server consolidation projects

- Partner since 2001
- Implemented RAC infra for largest business house in India
- Implemented complex SUN compute grid

- Partner since 2000
- Handled migration from Linux to Microsoft Exchange, Active Directory and SharePoint deployments

Partner since 2009
